(4 marks)

b) Name **SIX (6)** components of a web site.

(6 marks)

QUESTION 3

a) State **TWO (2)** rules used by variables in JavaScript.

(4 marks)

b) Describe **TWO (2)** ways to include jQuery in your web pages.

(6 marks)

QUESTION 4

- a) Produce the result of following PHP operation.

```
<?php
echo "<p>with while: </p>";
$i = 1;
while ($i < 0) {
    echo $i . " <br>";
    $i++;
}
echo "<p>with do-while: </p>";
$i = 1;
do {
    echo $i . " <br>";
    $i++;
} while ($i < 0);
?>
```

(6 marks)

- b) Prepare a PHP function with two arguments (surname and year) that will produce following results:

```
Maslina Ahmed. Born in 1989
Hardy Ahmed. Born in 1990
Azmi Ahmed. Born in 1987
```

(6 marks)

- c) Write a PHP script to loop through a list of three cars (Axia, MyVi, Bezza) by using an indexed array and display its content.

(8 marks)

QUESTION 5

- a) Determine HTML script to create Web page as shown in Figure 1. Insert pak-belang.png file in the article. The text in the page must be formatted as shown in Figure 1.

Profil Pak Belang

Harimau Malaya (*Panthera tigris jacksoni*) merupakan salah satu subspesies harimau belang yang masih wujud di dunia dan ianya hanya terdapat di Semenanjung Malaysia dan tidak terdapat di Sabah dan Sarawak.

Terdapat sembilan (9) subspesies harimau belang di dunia dan 3 subspesies telah diisytiharkan pupus.

Subspesies yang telah pupus :

Spesis	Nama Saintifik
Harimau Bali	<i>Panthera tigris balica</i>
Harimau Jawa	<i>Panthera tigris sondaica</i>
Harimau Kaspian (<i>Panthera tigris virgata</i>)	<i>Panthera tigris virgata</i>

(5 marks)

- b) Illustrate the Web page that is rendered from the following HTML script.

```

<h1>Seminar Registration Form</h1>

<form method="POST" action="registration-form.php">

  <fieldset>
    <legend>Participant Registration Form</legend>
    <p>
      <label for="name">
        <span>Name: </span>
      </label>
      <input type="text" id="name" name="username">
    </p>
    <p>
      <label for="Affiliates">
        <span>Email: </span>
      </label>
      <input type="email" id="email" name="email">
    </p>
    <p>
      <label for="gender">
        <span>Gender: </span>
      </label>
      <label for="gender_1">

```

```

<input type="radio" id="gender_1" name="gender" value="Male" > Male.
<label for="gender_2">
  <input type="radio" id="gender_2" name="gender" value="Female" > Female.
</label>
</p>
  <p>
    <label for="dob">
      <span>Date of birth: </span>
    </label>
    <input type="date" id="dob" name="dob">
  </p>
<p>
  <label for="Institution Name">
    <span>Institution Name: </span>
  </label>
  <input type="text" id="institution_name" name="institution_name">
</p>
<p>
  <label for="ins_type">
    <span>Category:</span>
  </label>
  <select id="ins_type" name="ins_type">
    <option value="universitu">University</option>
    <option value="school">School</option>
    <option value="institute">institute</option>
  </select>
</p>
</fieldset>
<p>
  <input type="submit" name="submit" value=" Register Me ">
  <input type="submit" name="cancel" value=" Cancel ">
</p>
</form>

```

(5 marks)

- c) Identify a script to create an online currency converter from Malaysia Ringgit (MYR) to United State Dollar (USD). Assume the rate is MYR 4.12 for USD 1. The script must be written using HTML and Javascript. Figure 2 (a) shows the initial page. Figure 2 (b) shows the conversion result in an alert window when a user clicks the "Convert to USD" button.

(10 marks)

PART B

QUESTION 1

A wireframe is a layout of a web page that demonstrates what interface elements will exist on key pages. It is a critical part of the interaction design process. The aim of a wireframe is to provide a visual understanding of a page early in a project to get stakeholder and project team approval before the creative phase gets under way. Wireframes can also be used to create the global and secondary navigation to ensure the terminology and structure used for the site meets user expectations.

Design a product page of an e-commerce Web site using wireframe. The design should include the **EIGHT (8)** features of e-commerce Web site.

(8 marks)

QUESTION 2

You are responsible to create a login page for mydomain.com web site using PHP programming language. Figure 3 shows the user interface design based on wireframe. User needs to enter correct username and password as on the Wireframe A. Username must be in email address format and must be checked at the client-side script. If the user enters incorrect username and password the login page will display an error message as shown in Wireframe B. If the user enters correct username and password, the login page will display Welcome message as shown in Wireframe C. Username and role must be stored in session variables. Initial username and role session values are assigned as 'Guest'.

Note: Assume the correct username is 'amran@mydomain.com' and the password is 'Sec@1ret'.
