Figure 1

(6 marks)

QUESTION 3

- a) Produce a JavaScript code on the following HTML code. Assigns values of name, program code, part, and CGPA in separate variables. The JavaScript should write the output in web browser same as the HTML script output.

```
<p>Name: Imran bin Haziq </p>
<p>Program Code: CS240 </p>
<p>Part: 5 </p>
<p>CGPA: 3.55</p>
```

(8 marks)

- b) Produce a JavaScript function to write user's name in a Web page. The function can be called as displayUserName("Aidan"). The output will be displayed as follows:

Username: Aidan

(10 marks)

QUESTION 4

- a) Produce Table 2 using PHP multi-dimensional array.

Table 2 : Cities in England

LN11	London
OX47	Oxford

(4 marks)

- b) Produce the output of the following PHP script.

```
$php
$text = ' How can I cook rice in a clean round pot? ';
echo strlen ($text). ' ,br>';
$text = trim ($text);
echo $text . " <br>";
echo strtoupper ($text). ' <br>';
echo strtolower ($text) . ' <br>';
$text = str_replace ('can', 'round', $text);
echo $text . ' <br>';
echo substr ($text, 2, 6). ' <br>';
var_dump (strpos ($text, 'can'));
echo ' <br>';
var_dump (strpos ($text, "could"));
?>
```

(6 marks)

QUESTION 5

- a) Produce the following table as shown in Table 3 in a Web page using HTML.

Table 3 : Mangsa Banjir di Pahang

Bilangan Mangsa Banjir Pahang 2021

900 orang	3314 orang
253 keluarga	892 keluarga

(6 marks)

- b) Produce a simple web page as shown in Figure 2 using HTML and Javascript.

What Can JavaScript Do?

Hello JavaScript!

Figure 2

(6 marks)

PART B

QUESTION 1

A wireframe is a layout of a web page that demonstrates what interface elements will exist on key pages. It is a critical part of the interaction design process. As a web designer, you are assigned to construct a checkout payment page in an e-commerce Web site using wireframe. The page should include the necessary information such as billing, delivery, and payment to complete the purchase and acceptable layout design. The page design should include header, footer, web page name, and navigation.

(15 marks)

QUESTION 2

You are assigned to construct a user registration page for e-commerce Web site using PHP. User needs to enter user profile information and password as shown in Figure 3. The User must enter full name, email address, and password. Other optional information are birthdate and gender. When user enters all required information, a successful message will appear on the page. Otherwise, an unsuccessful error message will appear.

Note: The information does not need to be stored in the database.

The figure displays three wireframe components for a user registration system. The first component is the 'User Signup' form, which includes input fields for 'Fullname*' (marked as required), 'Email*', 'Password*', 'Birthdate' (with a 'dd/mm/yyyy' placeholder), and 'Gender' (with radio buttons for 'Male' and 'Female'). A 'Signup' button is located at the bottom of the form. The second component is a 'Successful Signup Message' box, which shows the filled-in details: 'Fullname : Muhammad Ali', 'Email : mail@gmail.com', 'Gender : M', and 'Birthdate : 1989-03-23', followed by a confirmation message 'Thank you. You are successfully Signup'. The third component is an 'Unsuccessful Signup Message' box, which displays an error message: 'One or more required information are not entered. Please enter all the required information.' and a 'Go Back' button.
